Extended Education

Extended Education is an academic unit of the University that offers continuing and professional programming to adult learners. Our programs often take the form of short credentials such as Certificates and Letters of Accomplishment. We also offer programming that provides support for Indigenous and newcomer University students as well as for students admitted to the University in *General Studies*. Working in partnership with other faculties and departments of the University and with community organizations, we develop high quality programming that is responsive, accessible, and socially progressive.
